

Allison Keeps Delays At Bay

With thousands of transmissions operating in a variety of airport service vehicles around the world, Allison Transmission has efficiently moved people, luggage and containers for decades. Designed to exceed the most demanding requirements, Allison fully automatic transmissions deliver unparalleled productivity, reduced maintenance costs and precise vehicle control. From aircraft refueling trucks to passenger shuttle buses, the world's busiest airports rely on Allison Automatics to keep things moving.

- Air Platform Maintenance
- Aircraft Towing
- Airport Bus
- Catering
- De-Icing
- Fire Fighting
- Refueling
- Runway Clearing
- Toilet Servicing
- Towing

On the tarmac there is no room for error or delay, and service vehicles must be able to efficiently access the aircraft. Whether the vehicle handles baggage or refueling, stocking or towing the aircraft, the smooth shifts of an Allison Automatic provide precise maneuvering and accurate control for drivers at airports worldwide.

Thanks to smooth gear changes, an Allison fully automatic transmission delivers more consistent power to the wheels, allowing the driver to stay focused and easily maneuver the vehicle no matter what task is at hand.

The high reliability, productivity and durability of Allison transmissions translate to increased vehicle access no matter if the aircraft is early, late or right on time.

A World Of Support

From our headquarters in Indianapolis, Indiana, USA, to our manufacturing plants in Hungary and India, to approximately 1,600 Allison Authorized Distributors and Dealers around the globe, you are never far from the products, training, service and support you demand.

Our support starts from the moment an Allison transmission is specified. We work with you to ensure that the model and ratings fit your engine to create a tailored package of powerful performance and reliable efficiency. When you need parts or service, you can count on global access to factory-trained specialists and Allison Genuine Parts™.
