Vehicle Environmental
Test Center

Go to Market Faster

The Allison Vehicle Environmental Test (VET) Center is an industry-leading facility that allows OEMs, body builders, suppliers and end-users to satisfy their vehicle testing needs in a single, environment-controlled location.

Customers are now facing increasing system complexity, expanding regulatory requirements and higher demand for ever-faster time-to-market requirements. Allison has you covered. The VET's one-stop chassis testing can shorten your product development cycles dramatically, facilitating efficiency and ultimately cutting down the costs of bringing your product to market. The VET provides vehicle system development and validation in repeatable, reliable and seasonally independent conditions to get the test results you require.

Results That Matter

The VET's highly controlled environment enables an enhanced level of virtual product development, driving lower costs. Results from the VET are ideal for developing sophisticated, highly correlated simulations and models so design decisions happen early in the cycle, before prototype hardware investments.

Test Confidently

The VET is operated and managed by Allison Innovative Solutions (AIS), which ensures the facility is secured independently and is dedicated to keeping customer data and property secure and confidential.

The Answer is "Yes." The Solution is the VET.*

Will the VET be available to non-Allison parties for testing?

YES

Can custom testing be performed?

YES

Can I send my vehicle to the VET for testing without any of my own support staff on site?

YES

Will the cold environment temperature be maintained even with a vehicle operating in the chamber?

YES

Will my data and information be secure and confidential?

YES

Bottom Line

To get your vehicle to market quickly, you need repeatable, reliable and seasonally independent vehicle testing. You can get it all in one location at the Allison VET Center. Get a head start by contacting us at **allisontransmission.com/vet**

Faster Product Development Time
Lower Cost Product Development
Increased Speed of Innovation
Drive to Virtual Product Development
All in One Location. Any Time.

Cold Environment
-54F/-48C

Hot Environment
125F/51C

Altitude up to 18,000 feet

Chassis Dynamometer
Heavy- and Medium-Duty
All Wheel Drive Vehicles (AWD)

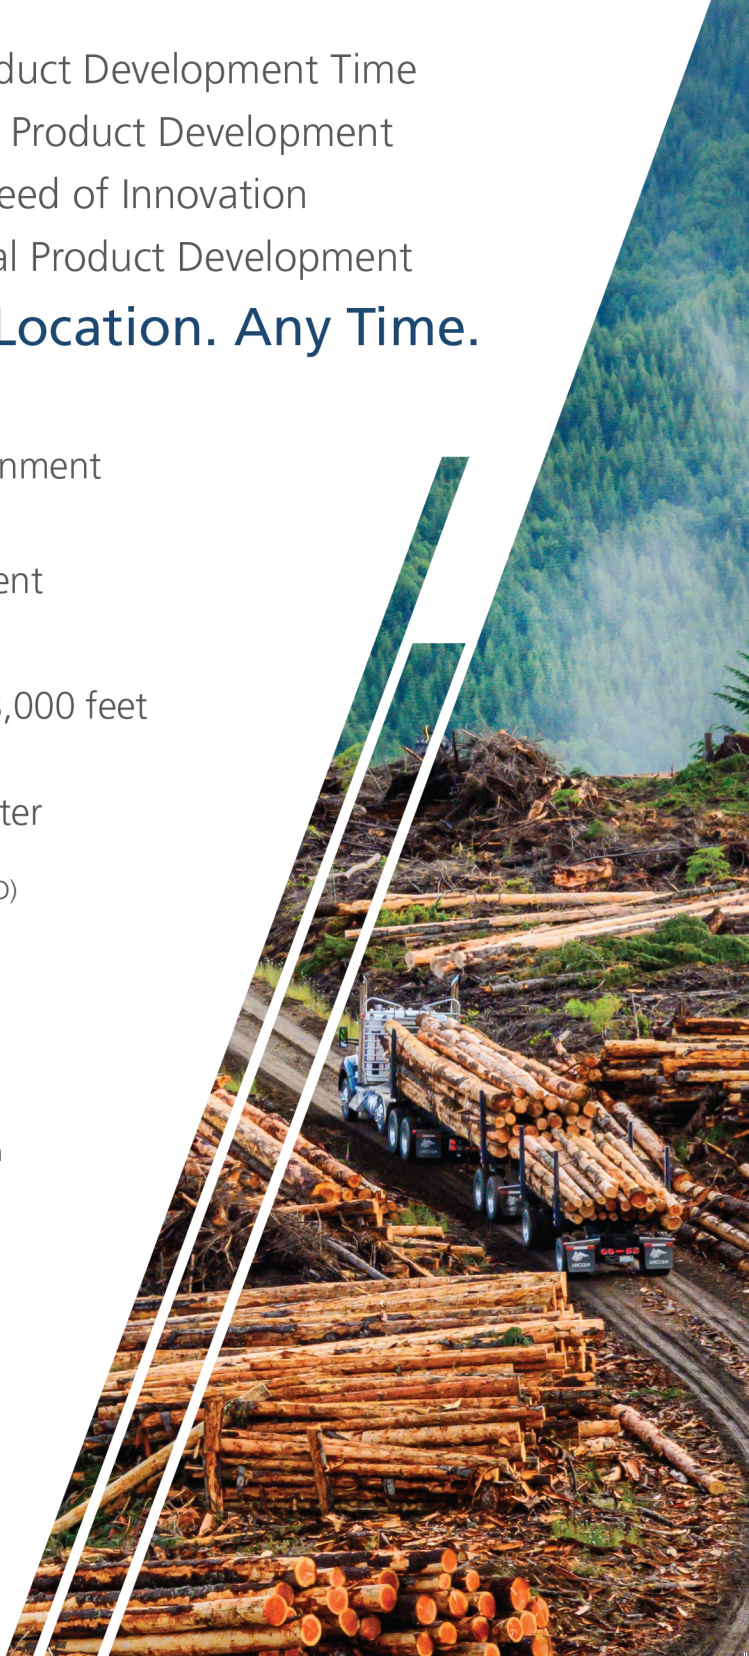

Electric/Hybrid
Vehicle System Emulation

Secure and Confidential
Environment for Data and Information

Types of Tests:

- Vehicle and System Performance/Development/Validation
- OBD Development
- Product Troubleshooting
- Regulatory (EPA 40 CFR Part 1066) Compliant
- Fuel Economy
- Controls Software Performance/Development/Validation
- Simulation and Analytical Model Validation/Correlation

A World of Support

From our headquarters in Indianapolis, Indiana, USA, to our manufacturing plants in Hungary and India, to approximately 1,400 Allison Authorized Distributors and Dealers around the globe, you are never far from the products, training, service and support you demand.
