

**Get the Most From
Your Rebuild**

“Whatever leaves this shop over my name must be of the finest work possible.”

 **James A. Allison**

The Right Choice

What makes an Allison Genuine Remanufactured transmission (ReTran®) different from other rebuilt transmissions? No other rebuild starts with a genuine Allison fully automatic transmission. It starts with our relentless commitment to quality and plays out in our ability to rebuild that transmission using only Allison Genuine Parts™ and our original factory specs. Nobody gets you closer to brand new, and nobody knows an Allison like Allison.

Remanufactured on Tradition

Unmatched reliability has made Allison the leading producer of commercial-duty fully automatic transmissions. We understand why people count on Allison, and that same philosophy is engineered into every ReTran®, part of the Allison Genuine ReMan™ product line.

What’s Inside a ReTran®?

Every Allison ReTran® transmission is remanufactured from the ground up at the Allison Transmission remanufacturing facility. Here, transmissions are disassembled part by part to clean, qualify and test each component for possible reuse. Additional components for a ReTran are always brand new, exclusively Allison Genuine Parts™. This pursuit of quality inside means you get a more dependable remanufactured transmission. It’s a promise you’ll only get with an authentic Allison ReTran.

What’s Inside Others?

Who knows? After all, what’s inside a transmission is not visible from the outside. If you’re not specifying a ReTran®, you can’t really know what’s inside. It could be anything, from inferior parts to substandard machining to inadequate testing, and it all could be built into an imposter’s remanufactured transmission. These substandard efforts can put people, payloads and performance at risk, and short-term savings can turn into long-term losses.

Total Confidence

Allison Transmission guarantees that every part and every process associated with an Allison ReTran® is 100% authentic. Only Allison ReTrans undergo our proprietary dynamometer testing to ensure they precisely meet the original factory specs. Rebuilders do not have access to our factory specs, processes or know-how. At every stage, each Allison ReTran is inspected for quality of the remanufacturing process, then measured against stringent wear-limit specs. The ReTran checklist provides an overview of our proprietary work.

The Allison ReTran® Difference

Categories	Allison ReTran®	Non Genuine
100% Exclusively Allison Genuine Parts™	Yes	No
100% Dynamometer Tested Against Allison Original Specs	Yes	No

Don’t Take a Chance With Your Reputation

You can’t put a price on the time you’ve spent building your business. An Allison ReTran® is with you for the long term, providing a product that positions you for on-the-job success, outperforming and outlasting the competition. Don’t put your people, your vehicles or your revenue at risk to save a little up front. It’s taken a long time to build your reputation. Trust it to Allison.

Standing Behind Our Work

Every Allison ReTran® comes with two years of unlimited mileage worldwide service coverage. Additional 2-Year Extended Coverage (EC) Warranty is also available for purchase. You're also supported by the same service network that stands behind every Allison fully automatic transmission...a service network that includes approximately 1,600 Allison Authorized Distributors and Dealers globally.

We know that downtime means lost productivity, so should you have a problem, we are nearby and committed to getting you up and running quickly. In addition, our ReTran facility is IATF 169490-certified and complies with the latest TS requirements.

Get Back to Work Faster

Our goal is simple. Getting you back to work fast and keeping you on the job with the power and performance you expect from your Allison transmission. With a ReTran,® you get renewed power and performance at a price that makes sense.
